

# JENBACHER

## GIVE YOUR ENGINE AND PARTS A NEW LIFE WITH INNIO JENBACHER REMANUFACTURING SOLUTIONS

As the experts who built your Jenbacher\* gas engines, we offer an economical alternative to buying new. Our Remanufacturing program's reUp engines and reUp spare parts deliver a new, longer life while meeting the same strict quality standards and specifications as our new engines and parts.

### UPTIME

More uptime means better production. And better production means higher profits. That's why our OEM reUp engines and reUp parts are not just rebuilt. They are carefully re-assembled and comprehensively tested before delivery.

### DISTRIBUTION

Select from a variety of convenient distribution options for fast and easy access to our remanufactured products. Our reUp engines and reUp parts are carefully packaged to ensure they are protected from the elements and can be installed right out of the box.

### COST SAVINGS

OEM quality, product reliability, and long-term performance improvements are available at a fraction of the cost with reUp engines and reUp parts.

### QUALITY OEM CAPABILITY

Protect your operational investment by relying on OEM materials, standards and specifications that deliver the same warranty as our new products.

### RELIABILITY

Our holistic and systematic Remanufacturing process delivers high reliability by returning worn parts to original or the latest OEM specifications.

### ENVIRONMENTAL FOOTPRINT

We save resources and reduce environmental impact by reusing materials, while helping increase efficiency, energy savings, and plant performance.
